

Life Threatening Health Conditions

Prior to attendance at school, each child with a life-threatening health condition will present a medication / treatment order from a licensed health care provider addressing the condition. A life-threatening health condition means a condition that will put the child in danger of death during the school day if a medication / treatment order providing authority to a registered nurse and a nursing care plan are not in place.

Following submission of the medication / treatment order, a nursing care plan will be developed.

Students who have a life-threatening health condition and no medication or treatment order presented to the school will be excluded from school, to the extent that the district can do so consistent with federal requirements for students with disabilities under the Individuals with Disabilities Education Act (IDEA) and Section 504 of the Rehabilitation Act of 1973, and according to the due process requirements in procedure 3411P.

The superintendent or designee will develop procedures necessary to implement this policy.
