

Student Immunization

Immunizations

In order to safeguard the school community from the spread of certain communicable diseases and in recognition that prevention is a means of combating the spread of disease, the Board requires a student to present evidence of his/her having been vaccinated against, or provide documentation of immunity against each vaccine-preventable disease listed in WAC 246-105-030.

The District shall allow for exemptions from immunization requirements only as allowed for by RCW 28A.210.090.

The District will exclude students from school only as allowed for by RCW 28A.210.120 and WAC 392-380-050.

Vaccination Information Distribution

The District will provide parents and guardians of students in sixth grade and above with information about meningococcal disease and human papillomavirus (HPV). Information will be available on the District website and at schools, and will address the characteristics of the disease; where to find additional information about the disease; vaccinations for children; and current recommendations from the Centers for Disease Control and Prevention regarding receiving the vaccine.

The superintendent or designee will develop procedures necessary to implement this policy.
